### INDICATIONS FOR USE:

- Fluids or tissues with potential pyrogenic or microbial contamination have had contact with the medical device for an indeterminable period of time.

### CONTRAINDICATIONS:

- Puncture of the breast capsule due to breast implant can lead to infection.
- Avoid puncturing the breast capsule during implant insertion to prevent infection.

### WARNINGS:

- Use caution when inserting near a breast implant to avoid puncture of the implant capsule.
- Adverse reactions are possible. It is the responsibility of the physician to evaluate the risk/benefit prior to the use of this device.
- Hypersensitivity to the materials listed in the device description as they may suffer an allergic reaction to this implant.

### Dual Trigger Breast Tissue Markers:

- **SMUC10V**
  - **14G** BioDur™ 108
  - **V** Venus Permanent
  - **10 cm** rigid needle contains one PGA microfiber pad with one radiopaque marker, interwoven with PVA polymer.

### Breast Tissue Markers:

- **STM0780**
  - **865017**
    - **17G** BioDur™ 108
      - **R** Ribbon
      - **N/A** MRI compatible
      - **10 cm** rigid needle contains one radiopaque marker.

### Accessories:

- **STM0780**
  - **864017**
    - **17G** BioDur™ 108
      - **D** Coil Permanent
      - **10 cm** rigid needle contains one radiopaque marker with interwoven PVA polymer.

### Legend:

- **Taev®**
- **MassMark™**
- **Invisible®**
- **Universal**
